

ACCEPT CREDIT CARDS USING YOUR SMART PHONE

SaleManager Mobile is a user-friendly, virtual point-of-sale payment application that enables merchants while on the road to conveniently process real-time credit card transactions through their iPhone, BlackBerry, Google Android or Windows Mobile device.

SaleManager Mobile combines the simplicity of design and operation with advanced functionality and security. It is perfect for any mobile business that needs to process credit cards on-site. Smart Phone users can simply download the application, establish a merchant account with Capital Bankcard, connect to a WiFi, Edge or 3G network, and they're ready to go! Best of all it's only \$7.95 per month, no contract!

SaleManager MOBILE FEATURES:

- No need to purchase an expensive wireless terminal
- Compatible with existing cellular plan & no access fees
- Easy download mobile software
- Real-time credit card processing
- Encrypted and secure SSL connection to protect your customers' information through our PCI DSS certified gateway
- Robust reporting of transactions
- Automates end-of-day batch processing procedure
- Quick reference guide to easily assist with operating functions
